Please be aware that this page does not replace the official product manual. It is the first revision of what we call a cheat sheet. This sheet is meant to be a convenient reference page of necessary components per configuration, an image of the configuration, and a non-exhaustive tips sections, to assist you while on the field working. It should be used at your own discretion. It is crucial to understand that the information provided here is suggestive and not definitive, and it does not substitute for proper training.
